Datasheet MKS Pneumatic Clamping with spring load

a) Holding load >= 400 N
   Opening pressure >= 5.5bar
   max. pneumatic operation pressure: 8bar
   Additional pressure support of 5.5bar (PLUS connection)
   Holding load (PLUS connection) >= 1050 N
   Holding load examination occurs in mounted state
   on oiled surfaces (ISO: VG 68).

b) A stable connecting construction has to be heeded.
   Please note assembly instruction before operating.
   Technical modifications reserved.

c) The thread quality inspection made by plug thread gauge.
   Depth of thread is inspected by a common screw DIN EN ISO 4762.

d) All pneumatic connections are closed by manufacturer.
