Datasheet MK Pneumatical Clamping

MK5 Pneumatical Clamping with spring load

a) Holding load MK >= 1,000N / 6bar
   Holding load MKS (spring energy storage) >= 600N / Opening pressure >= 5.5bar
   Holding load MKS (PLUS-connection) >= 1,300N / 6bar

Max. pneumatic operation pressure: 8bar

b) A stable connecting construction has to be heeded.
   Please note assembly instruction before operating.
   Technical modifications reserved.

c) The thread quality inspection made by plug thread gauge
   Depth of thread is inspected by a common screw DIN EN ISO 4762.

d) All pneumatic connections are closed by manufacturer.
