Datasheet MKS Pneumatical Clamping with spring load

a) Holding load >= 1.050N
   Opening pressure >= 5.5bar
   max. pneumatic operation pressure : 8bar

b) A stable connecting construction has to be heeded.
   Please note assembly instruction before operating.
   Technical modifications reserved.

c) The thread quality inspection made by plug thread gauge.
   Depth of thread is inspected by a common screw DIN EN ISO 4762.

d) All pneumatic connections are closed by manufacturer.
