Datasheet MKS Pneumatical Clamping with spring load

a) Holding load >= 1.250N
Opening pressure >= 5.5bar
max. pneumatic operation pressure <= 8bar

Additional pressure support of 5.5bar (PLUS-connection)
Holding load (PLUS-connection) >= 3.250N

Holding load examination occurs in mounted state on oiled surfaces (ISO VG 68).

b) A stable connecting construction has to be heeded.
Please note assembly instruction before operating.
Technical modifications reserved.

c) The thread quality inspection made by plug thread gauge.
Depth of thread is inspected by a caliper screw DIN EN ISO 4762.

d) All pneumatic connections are closed by manufacturer.
