Datasheet MKS Pneumatic Clamping with spring load

a) Holding load >= 1.450N
Opening pressure >= 5.5bar
max. pneumatic operation pressure = 8bar

Additional pressure support of 5.5bar (PLUS-connection)
Holding load (PLUS-connection) >= 3.700N

Holding load examination occurs in mounted state
on oiled surfaces (ISO: YG 68).

b) A stable connecting construction has to be heeded.
Please note assembly instruction before operating.
Technical modifications reserved.

c) The thread quality inspection made by plug thread gauge.
Depth of thread is inspected by a common screw DIN EN ISO 4762.

d) All pneumatic connections are closed by manufacturer.
